3.1 Level of Login and Usage:-

State	District	Mother unit
Granting permission to capture the data through Web or Mobile Application	To register IMEI no. for Mother unit Login	Once the permission is granted to capture the data for use of web application then only Mother unit Login will work.
	To Modify the data regarding transactions which are captured through Application	Data capture through replica will be done for following Modules:-
		Batch Monitoring
		Household Batch
		Poultry Production

While using web Application of Poultry Application some points must be ensured:-

1. Data Entry through Mobile Application and Web should not be done simultaneously.
2. Batch Creation should only be done through Mobile Application Only

Snapshots are as follows:-

The top screenshot shows the 'e-Poultry Farm' dashboard with a 'Master Entry' table. The table has columns for District, IMEI No., District Name, and IMEI No. The data rows are as follows:

4. Process to Update the Poultry records: - .

After successful login, A light green page is displayed with Blue and yellow Icons.

Press each blue icon one by

*After pressing blue icon, if it shows No Mother unit Download then it means that Mother unit is not created in CBO MIS. In order to deal with the Situation Kindly Provide CP login id of that Block. Also without successful download of mother unit No batch creation will takes place.

This is used in following cases.

Sr.No.	Usage	Condition
1	Multiple Login ids and Same Mobile Phone	More than one Mother Unit in one block
2	Change in Mobile Phone	IMEI will Change & further it will be used
3	Project Staff Transfers from One block to another	Change in IMEI Member
4	Application Crashes	Uninstall app, Mobile Restart and then install app.

5. Operation Module for Poultry app

5.1 Batch Creation: -

- It is unique for each mother Unit.
- It is in incremental basis, and automatically available by pressing or small button →

Get Batch no.

- After creation of batch, batch should be uploaded. It is Compulsory.

5.2 Batch Monitoring: -

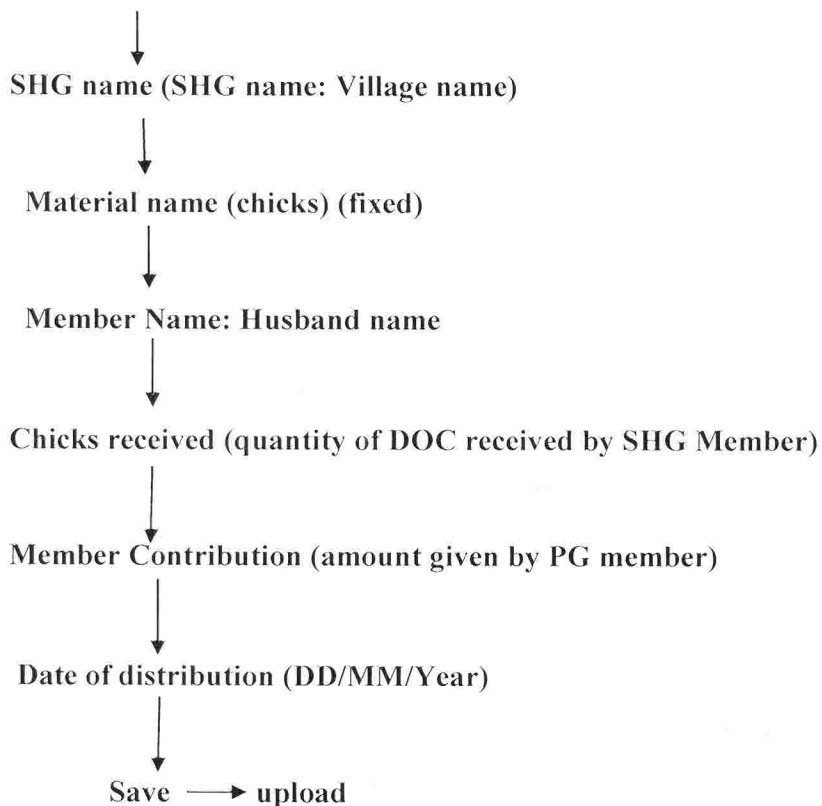

- For every batch created, 4 batch monitoring details should be entered
- First 3 for vaccination and last for distribution.
- Mortality will be further divided into 4 parts for each vaccination and one for distribution.
- Inspection date is compulsory, it should be filed initially for 3 times as vaccination date and last for distribution date.
- **While entering the vaccination date, distribution date, should be Null.**
- **While entering distribution date vaccination should be Null.**
- Sample is in the table: -

Sr. No.	Vaccination name	Date of Vaccination	No. of Mortality	Inspection date	No.bird distributed	Date Distribution
Update-1	Ranikhet	dd/mm/year	M1(0-7 days)	dd/mm/year	Null	Null
Update-2	Gambro	dd/mm/year	M2(8-14 days)	dd/mm/year	Null	Null
Update-3	Lasota	dd/mm/year	M3(15-21 days)	dd/mm/year	Null	Null
Update-4	Distribution	Null	M4(22-28 days)	dd/mm/year	No. of chicks distributed	dd/mm/year

M1-Mortality in 0-7 days, till vaccination

5.3 Household Monitoring: -

Firstly, Select Batch.

Points to Consider before Entry:-

- While digitalizing the distribution register always tick those member (distribution register), who are available in the poultry mobile app.
- While entering distribution date, fill the exact date on which birds are distributed.
- If any member is not visible in MIS, kindly submit PG profile in data centre, so that member will be visible after transferring data to NIC.

5.4 Upload and Pending: - These are very important factors in data digitisation, checking the data whether it is uploaded or not. **Always prevents duplicate data entry. such as duplicate entry of batch creation, batch monitoring, member and household data.**

- Each module has 2 small check boxes of upload and pending **where U stands for uploaded data, data transfer to server.**
- **P stands for Pending**, it's simply mean that data is in mobile.
- To upload the same data, user need to scroll down. The same module where four icons will be visible and last uploaded, after processing pending data will be cleared.

6.1 DO's:-

1. Since upload and pending depends upon server and internet speed. So, it is advisable to keep patience while using Mobile Application
2. Mobile application can be used in both online and offline mode.
3. Always save the data first then upload.
4. Initially digitalize data for one mother unit, then for other subsequent mother units.
5. Always check for what is Pending and what is uploaded.
6. To know the transaction details simply click on the Pending and uploaded icon. Yellow backdrop will appear in which small grey strip will be available.
7. Edit is also possible, simply click on the grey strip, it will be automatically open in edit mode, edit the data, save then upload.

6.2 Don'ts`

1. Never simultaneously try to digitalize data for more than one mother unit through same.
2. Avoid the duplication entry of distribution register
3. Do not create multiple batch creation for same mother Unit

7. Reports

Reports are visible at the NIC dashboard.
