e-Learning Management System (e-LMS)

BRLPS has been a pioneer in digital transformation, streamlining thematic interventions through various integrated platforms. In continuation of this effort, the e-Learning Management System (e-LMS) has been developed to facilitate capacity building, skill development, and training for staff and Community Based Organisation (CBO) members.

The e-Learning Management System (e-LMS), is an ERP-based application that has been customised and developed to support these activities. The platform serves as a centralised digital learning hub to create, manage, and disseminate training content in an interactive and structured manner, along with enabling progress tracking and assessments.

The major features and benefits of e-LMS includes the following:

- It supports content in the form of text, audio and video and will be accessible on mobile device, tabs and laptop.
- The e LMS ERP solution is multi-lingual.
- The platform is enabled with AI/ ML tools for content preparation, personalized learning, etc.

The e-LMS platform is fully functional and operational, with learning content contributed by themes. The URL for the same is : https://lms.brlps.in . The contents are majorly provided by Health Nutrition and Sanitation, Social Development, Non Farm, Farm, Livestock, etc.

Going forward, the e-LMS portal is to be used as major tool for imparting training at every level. All thematic heads are instructed to develop videos related to trainings and provide it to MIS theme for its upload and visibility. All thematic heads will review and approve the content and ensure that the approved content is uploaded on the e-LMS platform. Each theme to upload minimum one training video on the e-LMS portal from August, 2025.

It is being directed to all the staffs to register/ login in the e-LMS portal by 14.08.2025 and start using the e-LMS platform for their training and learning needs. MIS Theme will provide technical support and conduct trainings of master trainers (M&E Managers) in each district.
