MDM enrolment should happen automatically through Google Zero-touch or OEM equivalent Zero-touch platform. MDM needs to provide the following features –</p> <p>Organization should be able to create multiple groups at required levels. The group size may vary. The groups should support text msg, image, video file and data-based calling features. The groups should be formed using IMEI numbers of the devices of all devices. There can be minimum one group to connect with all devices mentioned. The communication between devices should be end-to-end encrypted with encryption to be At-rest and In-transit. The group to share text msg., image, video files and databased calling functionalities.</p> <p>Bidder must submit a MAF and compliance from OEM of the MDM. MDM to be provided in cloud-based environment.'</p> |
| 10. | Change in the World Bank's standard format for Manufacturer's Authorization | This is an astounding change in this Tender to favour one particular OEM (Samsung) and the entire bidding process. | | <p>The MAF is standard format of the document of the World Bank. This document is revised by the World Bank time to time.</p> <p>The MAF available in the floated bid document is part of</p> |

| | | | | |
|--|--|--|--|---|
| | | <p>Furthermore, this will completely ensure that the Tender will operate in a monopolistic process, and BRLPS requires no other brand's participation. In the previous RFP, the Manufacturer's Authorization was requested in the World Bank's standard format, which made it obvious that an OEM would authorize just one bidder to participate in that RFP. Therefore, it is clarified that this para cannot be altered/ modified as it is a standard format of bidding document of the World Bank," BRLPS said in the explanatory note in response to requests from several bidders for changes.</p> <p>That ensured the Tender couldn't happen unless many different brands participated in the procurement. However, BRLPS astonishingly deleted that World Bank's condition from this Tender, indicating their</p> | | <p>standard bidding document of the World Bank.</p> |
|--|--|--|--|---|

| | | | | |
|-----|--|---|--|---|
| | | <p>confidence that just one brand will participate. Because this goes against World Bank criteria and norms, BRLPS should follow the standard MAF structure of the World Bank and only allow one OEM and one Bidder in this Tender.</p> | | |
| 11. | <p>Storage Expandable upto (in GB): 1 TB</p> | <p>In the Tender, BRLPS has asked for an extremely stringent 1 TB of expansion of Internal Storage. There is just one OEM- Samsung that offers such extensibility. The Department just needs a tablet with 256 GB of internal storage as MDM will restrict the installation of unwanted apps, which saves internal storage. We want to draw your attention to the fact that the BRLPS has requested MDM, which would limit third-party software installations, including those for social media and adware. As a result, 256 GB of storage space is adequate, and expansion to 512 GB is unnecessary. The BRLPS will not need 1TB</p> | | <p>Smartphone Storage Expandable up to (in GB) - Min. 256 GB or Higher. Rest content remains the same as original bid document.</p> |

| 12. | OEM should have their own Android service application wherein details of tollfree numbers should be mentioned, and the application should have a minimum of six support features, including the following three (03) features- <ul style="list-style-type: none"> · Service Centre Locator Book a repair Feedback | There is just one OEM- Samsung that provides this kind of service application. Every original equipment manufacturer (OEM) is different regarding Android servicing apps and features. That's why all OEMs have different application features designed according to their capabilities and features. Accordingly, given these requirements of android service applications, none of the other OEMs other than Samsung will participate in this Tender because all OEMs work with different Android apps. The same feature was also there in last (Bid Reference: IN-BRLPS-165493-GO-RFB) "Features should include FAQs, Call to CS Support Center, Remote Control Support, and Listing of Service Locations" which was later made "OPTIONAL." In the Tender, BRLPS has already asked for a support escalation matrix complete with phone numbers, which directly contradicts what is needed for an Android service app. When a user is experiencing issues with the application, they should use the escalation matrix instead of trying to figure it out on their own by using such applications.</p> <p>As a result, we'd like to ask the BRLPS to remove this clause, as it doesn't add any value and makes the Tender unfairly biased against one particular</p> | | |
